

Diversey™

TASKI® Jonmaster Ultra Damp Mop

Key features

- Highest quality microfibre material
- Excellent cleaning performance
- Effective bacteria and spore removal

Advantages

- Extended lifetime
- Highest ever efficiency and m²-productivity
- Hygiene security

Description

The Jonmaster Ultra Damp Mop is made from 50% ultra microfibre and 50% polyester. The new and improved, state of the art, finest fibres are longer with an open construction allowing for increased dirt pick up and better than ever cleaning results. In addition the polyester fibre significantly reduces the friction of the mop improving the ergonomics. Whilst becoming more comfortable for the user it also increases the overall productivity of the site. The polyester content allows for a far more durable mop, extending the lifetime to a market leading 800 uses and washes providing the instructions provided by Diversey are followed.

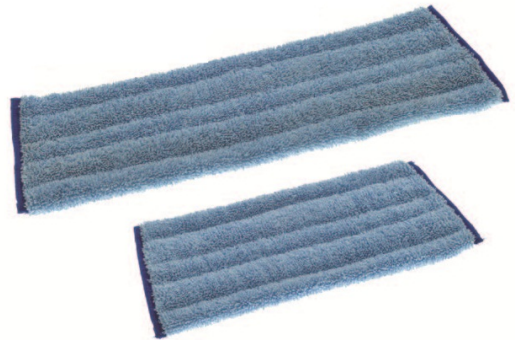

The TASKI Jonmaster Ultra Damp Mop is especially developed for damp mopping in areas which are cleaned often and have a hygiene demand. For the first time the new and improved premium range of mops are independently tested by TNO. The premium mop range has now been tested and approved for both bacteria and spore removal.

Instructions for use

The TASKI Jonmaster Ultra Damp mop is to be used damp, with 185% of moisture to assure the best cleaning effect. Remove the lid from the mop case and press the required Jonmaster Mop Frame against the backing of the TASKI Jonmaster Ultra Damp Mop. The velcro panel immediately attaches the mop to the mop frame. Lift the mop out of the mop case. Start mopping along the skirting board and then work inwards. Mop with circular motion, overlapping generously so no area is missed. Do not lift the mop from the floor when mopping or turning. Do not push the mop down against the floor either. After use remove the mop from the mop frame with a quick pull of the mop tab.

Please note

- Suitable for all types of hard flat floor surfaces
- Suitable for floors with a need for hygiene and cleanliness
- Avoid using softeners and detergents containing bleach
