TASKI®

Jonmaster Ultra Interior Mop

Product Descriptor

Key features

- Highest quality, microfibre material
- Excellent dust pick-up properties
- Adjustable mop frame shape

Advantages

- High mop durability
- Outstanding dust removal
- Excellent reach

Description

Each TASKI Jonmaster Ultra Interior Mop is carefully manufactured using the highest quality materials available to guarantee superior results. The interior mop is produced from 100% ultra microfibre. The fibres are longer increasing the surface area for effective dust and dirt removal. All mops provide optimal dirt pick-up and glide properties for minimal operator fatigue, high m²-performance and excellent cleaning and hygiene results. The mops are guaranteed for 500 wash cycles provided the use and laundry instructions specified by Diversey are followed.

The TASKI Jonmaster Ultra Interior Mop is the perfect tool for dusting of small spaces and hard-to-reach surfaces such as bookshelves, lamps, radiators and pipes. The mop frame can easily be bent into suitable shapes and then easily adjusted back into its original flat shape. The mop holder fits all Jonmaster mop handles with a click fit – this increases the reach and use of the interior mop. The fine looped fibres of the microfibre mop make it easy to pick-up dust, dirt and hair by static charge attraction when used dry.

Instructions for use

It is recommended to use the TASKI Jonmaster Ultra Interior Mop completely dry to assure the best cleaning effect.

- Always rinse the mops without detergent
- Wash colours separately
- Do not launder together with other textiles
- Do not use any bleach, softener or highly alkaline laundry product
- Please take care that too high temperatures or over-drying causes thermal damage to the fibres
- When using microfibre materials please wear gloves to protect the skin of the hands.
- Do not use the interior mop on rough surfaces or surfaces treated with furniture polish.
