

# TASKI® MyMicro Cloths 2.0

## Good performance, time and time again!

### Key advantages

- High dust pick-up properties
- Colour coded

### Benefits

- Hygienic results
- High cleaning performance
- Fast and easy cleaning
- Comfortable feel

TASKI MyMicro is a knitted microfibre cleaning cloth designed for spray and wipe and pre-wetted cleaning. The fine fibres of the cloth make it easy to penetrate into the surface at a finer level than normal fibres, removing higher levels of dirt, dust and bacteria.

TASKI MyMicro is available in four different colours, red, blue, green and yellow, which enables end users to comply with common colour coding practises. The cloths are guaranteed for 300 washes when the recommended care instructions are followed.

### Usage

TASKI MyMicro can be used dry or damp and is most suited for spray and wipe or pre-wetted cleaning methods. When using the cloth, fine fibres create a capillary effect within the cloth that collects and retains dirt and dust particles from the surface, removing the need for a second drying pass. The cloths must be laundered for these particles to be completely removed.

### Caring for your TASKI MyMicro

- Wash colours separately
- Do not launder together with other textiles
- Always pre-wash or rinse the cloths without detergent after use with chemicals
- Do not use any bleach, softener or highly alkaline laundry product
- Note - Temperatures that are too high or over drying causes thermal damage to fibres

When using microfibre cloths please wear gloves.
