# TASKI® aquamat 10.1

## Compact spray extraction machine

### Key features

- Excellent deep cleaning results
- Quick and effective spot cleaning
- Ease of transportation
- Complete range of accessories

### Excellent deep cleaning results

Deep cleaning through spray extraction is the ultimate way of thoroughly cleaning your carpets. It increases the lifetime of your carpets by removing ingrained dirt whilst maintaining the high appearance levels of your carpet.

### Quick and effective spot cleaning

Keep this machine at hand to tackle any accidents. Together with the optional hand tool accessory and professional stain removal products, disruptions are minimised and efficiently dealt with.

### Ease of transportation

Due to its modular design, light weight and compact size, the TASKI aquamat 10.1 can easily be transported between locations.

### Complete range of accessories

The spray device can be used to pre-spray carpet detergent before deep cleaning, maximising cleaning results. The optional 12 cm hand nozzle facilitates deep cleaning of upholstery, stairs and other hard-to-reach areas. The carpet pile brush lifts the carpet fibres and gives the entire surface a uniform, even appearance and reduces drying time.

Solution tank	10 L	Nominal consumption	900 W
Recovery tank	10 L	Cable length	10 m
Maximum airflow	41 L/s	Noise level	66 dB(A)
Vacuum	18 kPa	Protection class	II
Dimensions (L x W x H)	380 x 380 x 600 mm	Approvals	CE/CB Test cert./ÖVE/SEV
Weight	12 kg		

Model	Article code
TASKI aquamat 10.1	D8003300ANZ-KIT11

Accessories	Article code
Spray extraction tool with hose (2.2 m) and fixed nozzle (8505140)	D8505140
Spray extraction tool with hose (2.2 m) and flexible nozzle (8505160)	D8505150

## Additional features

Suitable for hard floor and carpet cleaning

Depending on the accessories chosen, the TASKI aquamat 10.1 can be used for either hard floor cleaning or carpet spray-extraction. When choosing both tool sets, the TASKI aquamats really become a multi-functional piece of equipment.

The hard floor tool is especially suited to small-to-medium-sized areas like kitchens and washrooms. The solution spray, together with the hard floor bristle, provides effective mechanical action.

With the direct method, the soiled solution is directly removed from the floor. With the indirect method, the solution is left on the surface for a short period to increase contact time and is then removed with the hard floor tool by using the vacuum function of the TASKI aquamat 10.1. The tool provides excellent cleaning results, also on difficult-to-clean hard surfaces like ceramic tiles and anti-slip floorings.
