

Diversey™

TASKI®

# Jonmaster Pro Glass Mop

For a streak-free result!

## Key advantages

- Top-quality, patented microfibre material
- Excellent dust & dirt pick-up properties
- Streak-free & lint-free cleaning

## Benefits

- High mop durability
- Outstanding cleaning performance
- Ideal for cleaning large vertical surfaces

The fine microfibres of Jonmaster Pro Glass Mop make it easy to pick-up and remove the smallest dust particles, dirt and grease from windows, mirrors and hard, polished surfaces including stainless steel.

The Jonmaster Pro Glass Mop cleans streak-free without leaving lint. The Jonmaster Glass Mop was developed to provide the ergonomic advantages of working with TASKI Ultra Plus Telescopic Handles and TASKI Ultra Plus Frames. The Ultra Mop Frame fits all Jonmaster mop handles with a click fit – this increases the reach and use of the Glass mop.

Each Jonmaster Glass Mop is carefully manufactured using the highest quality materials available to guarantee superior cleaning performance. All mops provide optimal soil pick-up properties for excellent cleaning and hygiene results.

The cloths are guaranteed for 500 wash and use cycles provided the instructions of use and laundry instructions specified by Diversey are followed.

## Usage

To assure the best cleaning effect, take a clean dry Jonmaster Pro Glass Mop and spray some of Diversey's cleaning solution on the surface and wipe this vertical surface.

When using the Jonmaster Pro Glass Mop, fine fibres create a capillary effect within the cloth that collects and retains dirt and grease from the glass or shiny surface. For these particles to be removed completely the mop needs to be well-rinsed and laundered.

## Caring for your mop

- Always rinse the mops without detergent
- Do not launder together with other textiles
- Do not use any bleach, softener or highly alkaline laundry product
- Please take care that too high temperatures or over drying causes thermal damage to the fibres
