

Diversey™

# TASKI® UltraPlus Handles and Mop Frames

- Robust
- Telescope function
- Soft rubber grip

## Benefits

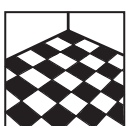

- Durable, hard wearing
- Easy handling
- Ergonomic and comfortable mopping

## Description

The robust TASKI UltraPlus handles and frames are designed to provide the highest ergonomics and cleaning comfort. The telescopic function allows for mopping at the correct working height preventing unnecessary strain. The soft rubber grip also makes handling very user-friendly and prevents handle sliding when placed against walls or tables. The smooth surface of the handles makes it simple to wipe off and to keep clean.

The frames come in a range of sizes for cleaning in a variety of different areas from washrooms to corridors. Both the 25 cm and 40 cm frames incorporate a locking system for vertical surface cleaning. The frames can also be colour coded with disc inserts for specific area cleaning.

The frame Velcro is also of the highest quality and allows for excellent connection to all mops within the Jonmaster range.

The Diversey logo features the brand name in a white serif font inside a dark blue leaf-like shape. A small leaf icon is positioned to the right of the text. A trademark symbol (TM) is located at the top right of the leaf shape.
