

Jonmaster[™] T-Handles

The new ultra generation!

Key advantages

- ▶ Robust
- ▶ Telescopic function
- ▶ Soft rubber grip
- ▶ Unique click-fit

Benefits

- ▶ Durable, hard wearing
- ▶ Easy to adjust to correct working height
- ▶ Ergonomic & comfortable mopping
- ▶ Compatible with all Jonmaster frames

The new ultra generation of Jonmaster handles & frames, mop handle, has been especially designed for the professional Jonmaster system.

The robust Jonmaster Ultra Flex T-Handle is a synonym for highest ergonomomy and cleaning comfort. With a simple twist, the innovative telescopic function allows working at the correct working height .

Thanks to the comfortable and highly ergonomic soft rubber grip, handling is very user-friendly. Moreover, the handle is completely rubber-coated which prevents the handle from sliding when placed against walls or tables. The smooth surface of the handles makes it simple to wipe off and to keep clean. All handles are autoclavable.

Application

Jonmaster™ T-Handles

Weight	760 gr	Colour	black, silver

Packing details

Description	Packaging	SKU Number	Availability
Jonmaster Ultra T-Handle 100-170cm	2pc	7514586	AU & NZ

How to use

To ensure an ergonomic way of cleaning the Ultra telescopic handles need to be adjusted to the correct working height. This can be achieved by placing one foot on the mop frame, twisting the upper part of the mop handle to unlock the system, extending the telescopic handle until the top of the handle reaches just below the chin and locking the handle again by twisting in opposite direction.
