

# When and where to use the Jonmaster System

## ▶ Daily / periodic cleaning

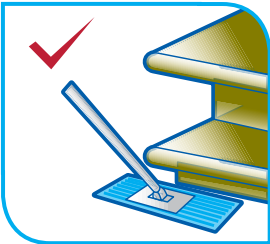

Facilitates efficient daily cleaning

Does not replace periodic cleaning tasks (i.e in hard water areas, descaler will still be needed)

## ▶ Small / large area floor cleaning

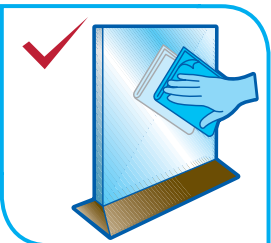

Mop facilitates cleaning of small/congested floor areas

Does not replace mechanical cleaning of large floor areas

## ▶ Light / heavy cleaning

Facilitates light cleaning

Does not remove heavy/greasy deposits from surfaces. If area is heavily soiled, use additional chemical and mechanical action

## ▶ Smooth / structured floor cleaning

Facilitates cleaning of smooth flooring

For rough, structured flooring use the heavy duty Jonmaster mop
